#### 1. Introduction

#### a. Background/Context for required services/results

The United Nations (UN) in partnership with the European Union (EU) launched a regional multi-year Spotlight Initiative to eliminate all forms of violence against women and girls (VAWG), including harmful practices (HP), and aims at achieving transformational change. Through a comprehensive approach, the Spotlight Initiative will focus its work on SGBV against women and girls through six key pillars: strengthening, developing and implementing relevant legislation and policies; strengthening national and sub-national institutions; preventing violence through evidence-based programmes and campaigns; ensuring the collection and use of prevalence and incidence data; strengthening or establishing essential services for victims/survivors; and partnering directly with women's movements and civil society.

The Spotlight Initiative in Central Asia will focus on SGBV against women and girls, and cover three countries (Afghanistan, Kyrgyzstan and Tajikistan). Kyrgyzstan among other countries was selected based on agreed primary criteria, including the prevalence of SGBV (including data from women's experience of violence in their lifetime and in the past 12 months and indicators making up the Gender Inequality Index); and secondary criteria that assessed current investments in ending violence against women and girls (EVAWG) at a national level and overall absorption capacity; political will and an overall enabling environment, including for civil society, national and partner capacities, to significantly progress interventions to prevent and respond to DV/IPV. The six pillars of the Spotlight Initiative's theory of change, will be implemented at a country-level and with selected pillars at a regional level which will add value in maximizing the investment, and contributing to the scale, sustainability, visibility, lessons learnt and adaptation of approaches throughout the region.

The SI Kyrgyzstan under the Pillar 6, focuses on changing normal modes of capacity building support and prioritizes the voices and expertise of CSOs through the 'Leading Change for EVAWG" approach while seeking to reinforce joint-actions for collaborative change. This is done through, inter alia, creating new spaces for collaboration, knowledge sharing and creating joint visioning amongst the broad range of the key civil society actors. In seeking to leverage the movement's expertise and support the CSOs in identifying joint vision and action for EVAWG (eliminating violence against women and girls)., SI intents to provide CSO's which experience and methodology in EVAWG can be upscaled and replicated with Social innovation grants. SI is contracting an organization with wide network in three provinces (Chui, Naryn and Osh) with targeted CSOs aimed at sourcing creative and innovative approaches to EVAWG.

#### b. Objectives

The overall goal of the activity: to support CSO's and missing groups (most vulnerable and marginalized) through Social innovation grants to empower them to act as agents of change brining new innovative solutions to eliminate VAWG.

To achieve this goal, the project will focus on the following outcome and related outputs:

**Outcome 6:** Women's rights groups, autonomous social movements and relevant CSOs, including those representing youth and groups facing multiple and intersecting forms of discrimination/marginalization, more effectively influence and advance progress in GEWE and ending SGBV.

- How any mid-course correction and adjustment of the design and plans will be facilitated on the basis of feedback received
- How the participation of community members in the monitoring and evaluation processes will be achieved

#### **Component 5: Risks to Successful Implementation** (1 page)

Identify and list any major risk factors that could result in the activities not producing the expected results. These should include both internal factors (for example, the technology involved fails to work as projected) and external factors (for example, significant currency fluctuations resulting into changes in the economics of the activity). Describe how such risks are to be mitigated.

Include in this section also the key **assumptions** on which the activity plan is based on. In this case, the assumptions are mostly related to external factors (for example, government environmental policy remaining stable) which are

### Component 6: Results-Based Budget (max. 1.5 pages)

The development and management of a realistic budget is an important part of developing and implementing successful activities. Careful attention to issues of financial management and integrity will enhance the effectiveness and impact. The following important principles should be kept in mind in preparing a project budget:

- Include costs which relate to efficiently carrying out the activities and producing the results which are set forth in the proposal. Other associated costs should be funded from other sources.
- The budget should be realistic. Find out what planned activities will actually cost, and do not assume that would cost less.
- The budget should include all costs associated with managing and administering the activity or results, particularly include the cost of monitoring and evaluation.
- The budget could include "Support Costs": those indirect costs that are incurred to operate the Partner as a whole or a segment thereof and that cannot be easily connected or traced to implementation of the Work, i.e., operating expenses, over-head costs and general costs connected to the normal functioning of an organization/business, such as cost for support staff, office space and equipment that are not Direct Costs.
- "Support Cost Rate" means the flat rate at which the Partner will be reimbursed by UN Women for its Support Costs, as set forth in the Partner Project Document and not exceeding a rate of 8% or the rate set forth in the Donor Specific Conditions, if that is lower. The flat rate is calculated on the eligible Direct Costs.
- The budget line items are general categories intended to assist in thinking through where money will be spent. If a planned expenditure does not appear to fit in any of the standard line item categories, list the item under other costs, and state what the money is to be used for.
- The figures contained in the Budget Sheet should agree with those on the proposal header and text.
